Goals of Research4Life Programmes (R4L)

- To connect developing world researchers with the international scientific community
- To reduce the ‘publishing gap’ and improve the quality of locally produced articles and journals
- To ‘ensure public access to information and protect fundamental freedoms, in accordance with national legislation and international agreements’ (UN Sustainable Development Goal #16)
- As of June 2018, more than 8900 institutions registered for R4L programmes

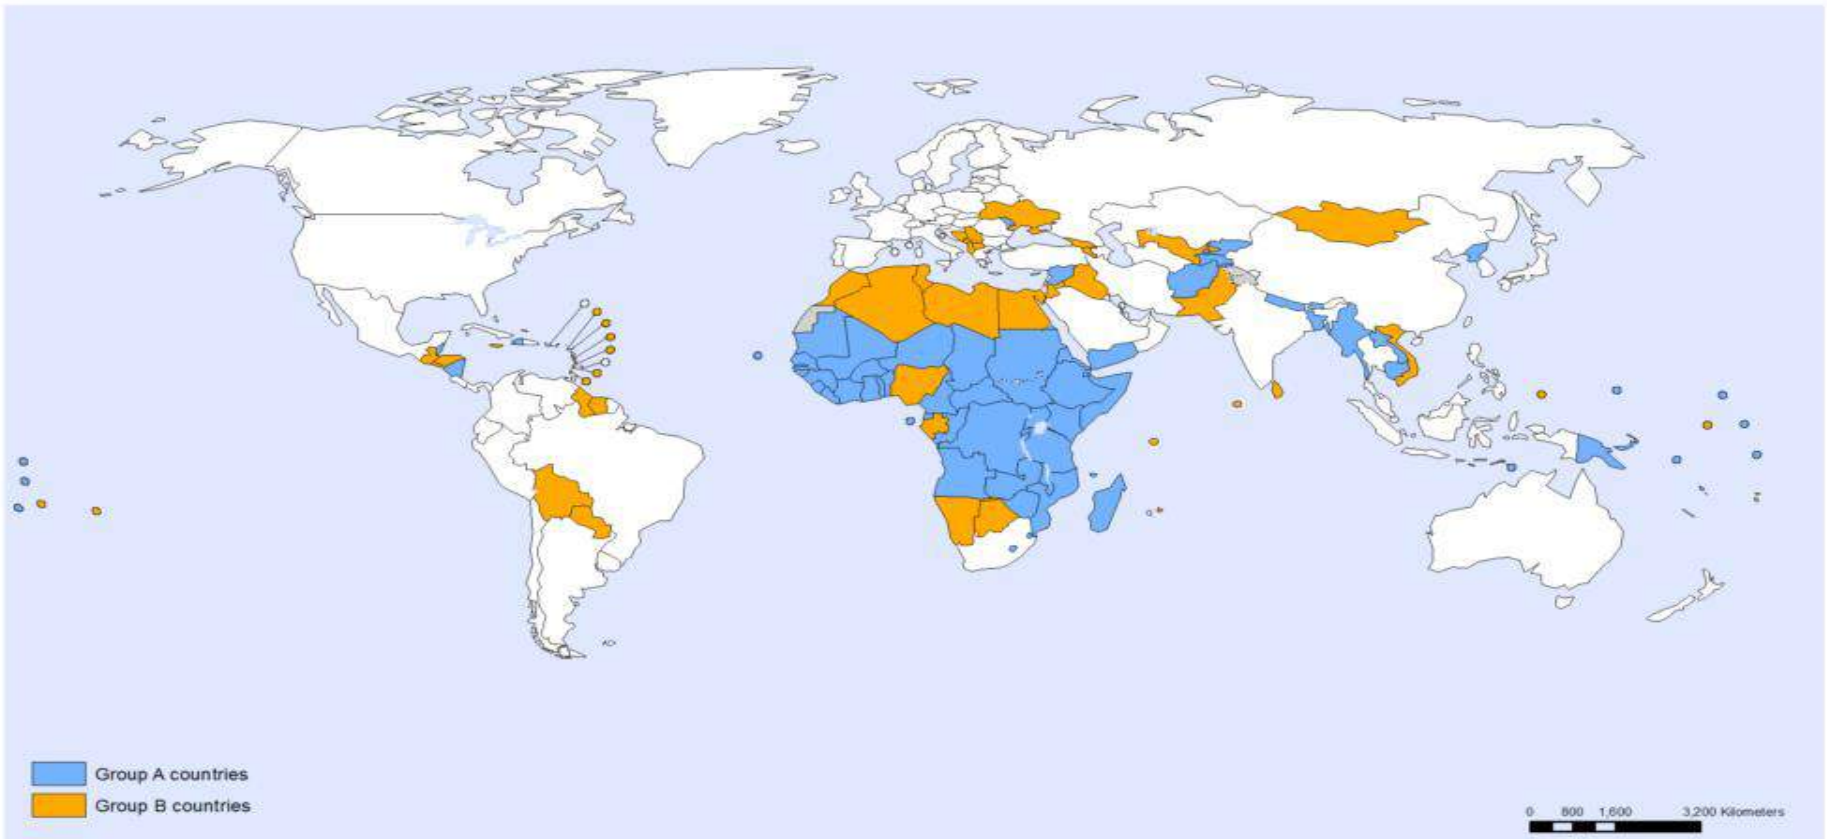

Primary Target Audiences

- Eligible categories of institutions are:
 - national universities
 - professional schools (medicine, nursing, pharmacy, public health, dentistry)
 - research institutes
 - teaching hospitals
 - government: ministries and agencies
 - national medical libraries
 - locally based non-governmental organizations (NGOs)

All permanent and visiting faculty, staff members and students are entitled to access and can obtain the institutional User Name and Password.

Who is eligible for R4L Programmes

Countries, areas and territories eligible for Research4Life

The boundaries and names shown and the designations used on this map do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

Hinari Access to Research for Health programme

Hinari Programme set up by WHO together with major publishers, enables low- and middle- income countries to gain access to one of the world's largest collections of biomedical and health literature. Up to 15,000 journals (in 30 different languages), up to 47,000 e-books, up to 100 other information resources are now available to health institutions in more than 100 countries, areas and territories benefiting many thousands of health workers and researchers, and in turn, contributing to improve world health.

Research4Life/INASP Advocacy Competition

The Hinari Team would like to invite you to participate in the Research4Life/INASP Advocacy Competition. This is a global case study competition to spotlight how users in the developing world have successfully advocated for a sustainable research culture. The competition is open to all researchers, librarians, policymakers, doctors and other professionals.

OARE

(One Access to Research in the Environment)

- Online portal to access environmental information
- Coordinated by UNEP/Yale University
- More than 3200 registered institutions
- Over 11,500 journals / 27,000 books / 25 other information resources / 35 publishers' content included [June 2018]

www.unep.org/oare

Online access to research in the environment (OARE)

The OARE programme enables academic, research and government institutions in developing countries to gain free or low cost access to an impressive body of research in the environment and related fields. Set up by the United Nations Environment Programme in 2006 together with Yale University and major scientific publishers, OARE provides access to a collection of up to 11,500 scientific journals, 27,000 e-books, 40 databases and other information resources in 118 countries.

OARE is designed to bridge the knowledge gap between developing countries and the industrialized world, and to build the capacity of researchers and experts to facilitate the development of science-driven policies for a sound management of the environment.

OARE is part of the [Research4Life](#) partnership, together with four other sister programmes with similar objectives: [Hinari](#), [AGORA](#), [ARDI](#), and [GOALI](#).

In Environment under review

Why does environment under review matter?

What we do

Environmental assessment

Early warning on emerging issues

▶ **Information management**

Passwords and registration

Institutions that would like to access full-text articles and use OARE search tools must register with OARE and receive an institutional user name and password. Upon successful completion of the registration process, all employees, staff, faculty, administrators and students of that institution should be provided the name and password so that they may access OARE resources directly. A user name and password are not required to access journal abstracts, but they are required to access the full-text articles and search tools.

- Country and institutional [eligibility](#)
- Register a [new institution](#)

Using OARE

Users can find basic guidance on how to access and use scholarly resources available through OARE in the Using OARE section of the website.

ARDI

(Access to Research for Development and Innovation)

- Online portal to access development and innovation research; ARDI was launched by the World Intellectual Property Organization in 2009 and joined R4L in 2011
- Supports researchers in developing countries in creating and developing new solutions to technical challenges faced on a local and global level
- More than 1000 registered institutions. Up to 7,300 journals; 22,000 books; 25 other resources; 35 publishers' content [June 2018]

www.wipo.int/ardi

ARDI – Research for Innovation

The Access to Research for Development and Innovation (ARDI) program, coordinated by WIPO together with its [partners](#) in the publishing industry, aims to increase the availability of scientific and technical information in developing countries. By improving access to scholarly literature from diverse fields of science and technology, ARDI seeks to:

- reinforce the capacity of developing countries to participate in the global knowledge economy; and
- support researchers in developing countries in creating and developing new solutions to technical challenges faced on a local and global level.

GOALI

(Global Online Access to Legal Information)

- Launched 06 March 2018, GOALI is a programme to provide free or low cost online access and training to law and law-related content to R4L eligible institutions
- The aim of GOALI is to improve the quality of legal research, education and training in these countries - to strengthen legal frameworks and institutions and further the rule of law.
- The programme initially has up to 1800 legal journals, 6900 books, 10 other resources from 55 publishers' content included.
- Partners include the International Labour Organization (ILO), Brill Nihoff (founding publisher and initiator of the programme), Lilian Goldman Law Library at Yale University and Cornell Law School Library. (July 2018)

MORE INFORMATION

Access to Research in the Developing World

Registration form is available

If your institution is an academic, government or non-profit organization, you can request access to the Research4Life Programmes ([check here](#))

Your institution might already be registered with one of the programmes. Before proceeding, please check the list of registered institutions ([registered universities](#) and [professional schools](#)) before proceeding.

Please note that (1) Only one registration per programme is required per institution, and (2) More than one contact is required to register an institution. (3) Individuals are not eligible to register, only institutions.

Once we review your registration, we will issue a common username and password for all staff at your institution. As Hinari, AGORA, OARE, ARDI and GOALI are in fact virtual libraries, we suggest that your institution's librarian be our main contact point. Should your institution not have a library, your director will be the main contact.

This is the initial page of the Registration page. Note the **HOW TO REGISTER** link.

HOW TO REGISTER

[ABOUT](#)

HOW TO REGISTER

The registration guidelines are available in: English [Español](#) [Français](#)

This document is a step-by-step guide to register online for the Research4Life programmes: Hinari, AGORA, OARE, ARDI and GOALI.

Following these simple guidelines will avoid problems in the registration process and ensure faster response to all registrations for the Research4Life programmes. Please review the following instructions in order to complete your registration:

Now opened is the **HOW TO REGISTER** page – with specific details on the process including the **List of Registered Universities and Professional Schools.**

Before registration:

- Before filling the online form, please make sure that you have all the needed information. The more information you provide on the form, the faster we can process your registration.
- If your institution is a **UNIVERSITY or PROFESSIONAL SCHOOL**, before filling the form, check the [list of Registered Universities and Professional Schools](#). If your institution is already listed **DO NOT REGISTER** again. Ask at your library for the access first and then send an enquiry to the HelpDesk.
- If your account (**UserID & password**) has **stopped working DO NOT REGISTER** again, send an email to the HelpDesk explaining the problem. They will work with you to reactivate your access.
- Do **NOT FILL MULTIPLE REGISTRATIONS** while you wait to hear from Research4Life. This just slows down the processing of all registrations while we check and eliminate duplicates. You may send an enquiry to the HelpDesk asking about the status of your registration.
