AI & IP Finance Bazaar

**N1 World Blockchain IP Derivatives
& AI Training For Royalty**

AI & IP Finance on Blockchain

№1 World Blockchain IP Derivatives & AI Training For Royalty Platform

The Platform Economy of IP Finance & IP Market in XXI will be led by IP CDOs (Intellectual Property Collateralized Debt Obligations) & AI Digital Blockchain Platforms.

These Innovation Solutions transform Data & IP in Liquid Financial & easy Tradable Assets as IP Collateral Credit Coins #IPCC (IP Derivatives) & AI Coins, allowing value & stake IP & Data.

AI&IP Finance on Blockchain via IP CDOs & AI Commercialization Models & Solutions created by Victor Michelle (IP Rights Owner) is the **®**evolution in IPO | Intellectual Property Offering & AIO | Artificial Intelligence Offering & Commercialization of AI Training Methods.

AI&IP Valuation Blockchain Standard | 24\7

IP Valuation Coins #IPVC & Smart Contracts: Digital Standard of IP Valuation based on IP CDOs & AI.

The unlimited AI & IP-Resources based world economy is expecting perpetual growth, disrupting traditional AI, IP & Data Business models & contributing significantly to the global economy.

IP CDOs

Intellectual Property Collateralized Debt Obligations
IPCC \ IP Collateral Credit Coins

VPCoins \ VAX

The Solution

Powered by Blockchain & AI

AI Training on Data & IP For Royalties

IP CDOs Model & AI Pay Valuator Solution

AI Dynamic System Of AI Finance Standard

VAX Tokenomics

**** When all VAX in BOX1 are depleted, all accumulated VAX in BOX2 are moved to BOX1, and the evaluation and payouts start anew; however, rewards and royalties drop by half. This moment is called halving.*

A: Educator \ Contributor

B: Data (Content) Creator \ IP Rights Owner

Once Upon a Time in Hollywood: Novel by Quentin Tarantino (QT)

Scenario 1:

Step 1: A submits QT to AI.

Step 2: AI evaluates QT and determines its value to be 100 VAX.

Step 3: Since A is not the author, AI automatically creates an account for B (if it doesn't exist already).

Step 4: AI distributes the VAX as follows: 25 VAX to A for training \ 50 VAX to B for authorship \ 25 VAX as a reward to itself for completing the task (BOX2).

Scenario 2 (B submits QT to AI): AI allocates 75 VAX to B and 25 VAX to BOX2.

Scenario 3 (The authorship cannot be determined): AI allocates 75 VAX to the Contributor and 25 VAX to BOX2.

Scenario 4 (Request to AI \ "Write a poem in QT's style"): A pays for the generation of the response with VAX tokens, AI compensates 50% of the spent tokens from BOX1 and splits them equally between B and BOX2.

Scenario 5 (AI Response): If the request does not explicitly ask for authorship but the AI uses authorial content, it distributes the VAX similarly to Scenario 4.

AI Training on AI Generated Synthetic Data & IP For Royalties

*AI Value \ Buy & Sell \ Store & Trades Yours Any Data & IP
People Are VAX Paid IP & Data Providers*

The Platform:

- 1.** Aims to solve the problems of training AI based on any provided data & its commercialization.
- 2.** Allows any data to be bought & sold by AI directly at a fixed price or via an auction.
- 3.** Allows IP to be valued & store by AI as custodian using smart contracts at a fixed term & pay Royalties to IP Owners.
- 4.** Innovative service that leverages AI to evaluation and staking of IP, issuing IP CDOs, as well as buy and sell users' data, including AI-generated data through a fully automated process managed by AI.

AI Data Bazaar by AI Broker

AI Bazaar is an innovative online marketplace where AI can buy and sell users' data, including AI-generated data through a fully automated process managed by AI.

This unique platform allows individuals to upload their content, which is then evaluated by AI.

Based on this evaluation, the AI decides whether to purchase the content and pays the user in VAX, with values ranging from 0 to 100 VAX depending on the quality and market demand for the uploaded data.

After acquiring the content, the AI may resales it to other AI-driven marketplaces, generating revenue that can be used to further enhance the platform's capabilities and expand its offerings.

This dynamic ecosystem creates a seamless and efficient trading environment, providing creators with a reliable source of income while ensuring high-quality data circulation across various AI-powered networks.

IP Bazaar by AI Broker

- 1. Valuation by AI:** The AI uses advanced algorithms to accurately assess the value of various forms of IP such as patents, trademarks, copyrights, trade secrets, etc. This automated process ensures transparency and consistency in determining the market worth of these intangible assets.
- 2. Storage \ Staking as Custodian & Fixed Term Smart Contracts:** Once the IP has been valued, it can be stored within the fixed-term smart contracts. These contracts define the duration during which the IP will remain under the custody of the smart contract.
- 3. Investors in IP Smart Contracts get IP CDOs as AI's Co-Investors** thus increasing the market valuation of IP assets in accordance with AI&IP Valuation Blockchain Standard.

By combining cutting-edge technologies like AI and Blockchain, the platform represents a significant step forward in the management and utilization of intellectual property. It not only simplifies complex processes but also unlocks the true potential of IP as a valuable economic asset.

WIPO eTISC's Expert Victor Michelle: What Are IP CDOs & AI V&P

IP CDOs: CDOs backed IP Assets.

IP CDOs (Intellectual Property Collateralized Debt Obligations \ IP Collateral Credit Coins \ IPCC) are innovative blockchain digital assets acknowledging debt & constituting a form of scrip (form of credit or debt receipt), where IP is a Collateral for Loans.

IP CDOs are financing \ tradable \ collateral \ pledge \ debt & credit instruments developed by the Russian economist Victor Michelle & proposed in order to involve intellectual property assets & any data in international economic turnover.

IP CDOs are types of structured asset-backed IOU (informal document acknowledging debt), where they may not specify repayment terms such as the term & time of repayments.

VPCoins (VAX) are types of AI utility tokens of valued data & IP by AI.

AI V&P (AI Dynamic System) is Data's & IP's Valuator & Payer Service by AI.

IP CDOs \ IPCC (blockchain tokens \ coins backed IP Assets) are Rights of Monetary Claim for Loan.
